Pathology Viva Questions:
Robbins 8th Edition

Pathology Unit 1:

Viva Questions

- Hyperplasia. (2/01, 1/07) pg 6-7
- Hypertrophy. (2/01, 1/07, 1/10) pg 7-8
- Hypertrophy vs hyperplasia (1/08) pg 6-8
- Atrophy. (1/07) pg 9-11
- Atrophy vs apoptosis (features/mechanisms). (2/01, 2/04) pg 27-31
- Metaplasia and dysplasia. (1/96, 2/04, 2/07 1/10) pg 10-11
- Atrophy, hypertrophy, hyperplasia, metaplasia. (2/97) pg 6-11
- Biochemical hallmarks of cell injury. (2/04) pg 14-18
- Reversible ischaemia and necrosis. (2/99, 2/02, 2/03, 2/04, 2/08, 1/09) pg 19-22
- Irreversible ischaemia (2/03) pg 19
- Reversible vs irreversible cellular injury. (1/02, 2/05, 1/06, 2/09) pg 19-20
- Define necrosis and give examples of types of necrosis. (1/96, 1/97) pg 21-22
- Coagulative vs liquefactive necrosis. (2/00) pg 21-22

Pathology Unit 2:

Viva Questions

- Reperfusion injury (2/05, 1/06, 2/06, 1/10) pg 24
- Atrophy vs apoptosis. (2/01, 2/04) pg 27-31
- Apoptosis (features and mechanisms) (2/04, 2/05, 2/06, 1/08, 1/10)
- Discuss steatosis. (2/04) pg 35-36
- Tell me about metastatic calcification. (2/04, 1/08) pg 41-42

Pathology Unit 3:

Viva Questions

- Vascular response to acute inflammation. (2/03, 1/06, 1/07, 1/09) pg 50-52
• Role of neutrophils in acute inflammation. (1/96, 1/01, 2/08) pg 53-61
• Chemical mediators of inflammation. (2/95, 1/99, 2/02) pg 63-74
• Role of the complement system in host defence. (1/02, 2/06, 2/08) pg 64

Pathology Unit 4:

Viva Questions

• Tell me about chronic inflammation. (1/98, 2/07, 2/09) pg 78-81
• Tell me about the role of macrophages. (1/95) pg 79-81

Pathology Unit 5:

Viva Questions

• Angiogenesis. (2/04, 1/08) pg 99-102
• Tell me about wound healing by primary intention. (86, 2/93, 1/95, 1/98, 2/98, 2/02, 1/04, 2/04, 1/05, 1/07, 2/09) pg 102-106
• Tell me about wound healing by secondary intention. How does this differ from primary union? (1/02) pg 102
• What are the complications of wound healing? (2/93) pg 106
• What pathological factors could affect wound healing? (1/00, 2/08, 1/10) pg 106-108
• Explain the mechanism of scar formation and fibrosis. (2/04, 1/05, 1/08) pg 104, 107

Pathology Unit 6:

Revision Week

Pathology Unit 7:

Viva Questions

• Pathogenesis of oedema. (1/93, 2/98, 2/99, 1/02, 1/03, 1/07, 1/10) pg 120-122
• Ascites. (2/95) pg 120
• Normal haemostasis. (1985, 2/09)
• Role of platelets in coagulation. (2/99, 2/03, 1/05, 2/06, 1/09) pg 126-127
• Clotting cascade:
Discuss this. (1/95, 2/99, 1/05, 2/06, 1/10) pg 127-130
Discuss factors that inhibit the cascade. (2/03) pg 125

- Venous thrombosis:
  - Predisposing factors and outcomes. (1/96, 1/97, 1/01, 1/04, 1/05, 1/09) pg 133
  - Pathogenesis. (2/99, 2/02, 2/06) pg 130-132
- Effects of arterial thrombosis. (1/01) pg 133, pg 135
- Embolism: sources and consequences. (2/95, 1/97, 1/99, 1/08, 2/09) pg 136-137
- Cellular pathology of irreversible shock. (2/97) pg 141-142
- Pathogenesis of septic shock. (2/97, 2/00, 2/05, 2/07, 1/09) pg 140
- Haemorrhagic shock. (2/99, 1/03) pg 141

**Pathology Unit 8:**

**Viva Questions**

- Cells of the immune system. (2/96) pg 196-202
- T-cells. (1/00, 2/00) pg 196-198
- B-cells (1/01, 1/03) pg 198-199
- Role of complement in immune processes. (1/03) pg 210
- Hypersensitivity. (1/95) pg 205
- Type 1 hypersensitivity. pg 206-209
  - Explain. (1/98, 1/99, 2/00, 2/07, 2/09)
  - Chemical mediators and their actions. (1/02) pg 208
- Type 2 hypersensitivity (transfusion reaction). (1/99, 2/00, 1/01, 2/05, 2/08, 1/10) pg 210
- Type 3 hypersensitivity. (2/99, 2/03, 2/05, 2/08) pg 211-214
- Type 4 hypersensitivity. (2/99, 2/07, 1/09) pg 215-218

**Pathology Unit 9:**

**Viva Questions**

- HIV virus and modes of transmission. (1/01, 2/03) pg 236-238
- Immunopathogenesis of AIDS. (1/96, 2/99) pg 238-243
- Abnormalities of immune function in AIDS. (2/98) pg 242 table 6-12
Pathology Unit 10:

Viva Questions

- Describe the pathogenesis of atherosclerosis. (1/95, 2/99, 1/01, 2/01, 1/03, 2/08) pg 521-524
- What are the microscopic features of an atheroma? (1/00) pg 517
- Tell me about the pathogenesis of essential hypertension. (2/01) pg 526-529
- Tell me about aneurysms. (1/95) pg 530-531
- Aortic aneurysms:
  - Pathogenesis (1/04) pg 531
  - Complications (2/04) pg 532
- What is an aortic dissection? (2/04, 1/07, 1/10) pg 532-534

Pathology Unit 11:

Viva Questions

- Pathophysiology of acute pulmonary oedema. (1/96) pg 562
- Tell me about the pathogenesis of MI. (2/98, 1/99, 1/00, 2/01, 2/07) pg 576-577
- What are the pathological consequences of acute MI? (2/03) pg 584-586
- Tell me about cardiogenic shock. (1/98) pg 584

Pathology Unit 12:

Viva Questions

- Tell me about hypertensive heart disease. (1/03) pg 587
- Tell me about calcific aortic stenosis. (2/04, 2/08) pg 590-591
- Infective endocarditis:
  - * Pathogenesis. (2/00, 2/02) pg 596-597
  - * What are the potential organ system effects? (2/00) pg 597
- Describe the pathogenesis of acute pericarditis. (2/03, 2/08) pg 611-612
- Hypertrophic cardiomyopathy (1/06, 1/09) pg 604-606

Pathology Unit 13:

Revision Week
Pathology  Unit 14:

Viva Questions:

- Outline the differences between benign and malignant tumours. (1/95, 1/97, 2/99) pg 281
- Tumour invasion and metastases. (1/05, 1/09) pg 279-281
- Invasion of the extracellular matrix. (1/05) pg 310-313
- What clinical effects may tumours have on their host? (2/09) pg 332-335
- Tell me about paraneoplastic syndromes. (1/05) pg 333-335
- What are tumour markers? (+examples).
- Which agents are thought to be carcinogenic?

Pathology  Unit 15:

Viva Questions

- Tell me about host barriers to infection. (2/95, 2/09) pg pg 352-353
- Describe how viruses cause cell injury. (1/02) pg 356-357
- Describe how bacteria cause cell injury. (1/02) pg 357-359
- Measles. (1/07) pg 363
- Herpes simplex. (1/07) pg 365-366
- Varicella zoster. (2/01, 2/05, 1/06) pg 368
- Tell me about staphylococcal infections. (2/95, 2/99) pg 371-372
- Tell me about streptococcal infections. (1/96, 1/00, 1/04, 2/09) pg 373-374

Pathology  Unit 16:

Viva Questions

- Neisserial infections. (1/09) pg 377-378
- Tell me about infection with M. tuberculosis. (1/05, 2/08) pg 381-386
- Pathogenesis of primary pulmonary TB (2/98, 2/03) pg 381-382
- Anaerobic bacterial infection. (2/99)
- Discuss clostridial wound infections. (1/01, 1/04) pg 393-394
- Clostridial infections. (1/08) pg 393-394
- Tell me about tetanus. (1/95, 2/98)
- Candidiasis. (2/08) pg 397-398
Pathology Unit 17:

Viva Questions

- Name the main constituents of tobacco smoke, and their effects on health. (1/01) pg 419-420
- Discuss the pathological effects of smoking on the lung. (2/03) pg 419-420
- Discuss the pathological consequences of heroin use. (2/03) pg 426
- What are the patterns of lung injury related to air pollution? (2/97) pg 429
- Lead poisoning (2/06) pg 432-433
- Tell me about radiation injury. (1/95, 2/97, 2/03, 2/06) pg 436-441
- Tell me about the systemic consequences of a thermal burn. (2/95) pg 445
- Vitamin K (1/09) pg 456
- Thiamine deficiency (2/06) pg 456-457

Pathology Unit 18:

Revision Week

Pathology Unit 19:

Viva Questions

- Tell me about the causes of ARF. (2/96) pg 960-961
- Post streptococcal glomerulonephritis. (1/06, 2/06) pg 974-976
- Nephrotic syndrome. (2/06, 1/08) pg 978-979
- Describe the pathological changes in the kidney in acute tubular necrosis. (1/00, 1/02, 1/06) pg 993-996
- What is the pathogenesis of pyelonephritis? (1/99, 2/00) pg 998-1000
- Analgesic abuse nephropathy (2/00) pg 1003-1004
- Describe the pathogenesis of hypertensive renal failure. (2/96) pg 1007-1008
- Obstructive uropathy. (1/00) pg 1012-1014
- Renal calculi:
Pathogenesis of kidney stones. (1/95, 1/99, 2/02, 1/06, 2/07) pg 1014
Consequences. (1/99, 2/02) pg 1015

Pathology Unit 20:

Viva Questions

- Types of atelectasis, pg 713-714
- What are the causes of ARDS? (2/96, 1/01, 1/04, 2/09) pg 715
- Emphysema:
  - Basic pathology of emphysema. (1/97, 2/00, 1/06, 1/07, 2/07, 1/10) pg 717-722
  - Pathological classifications. (1/97, 2/98) pg 718-719
- Pathogenesis of chronic bronchitis. (1/99) pg 722
- Asthma:
  - Pathogenesis. (2/96, 1/98, 1/02, 1/06, 1/07) pg 723-724
  - Pathological features. (1/04) pg 726
- Basic pathological processes of restrictive lung disease. (1/97) pg 729

Pathology Unit 21:

Viva Questions

- Pathogenesis of pulmonary embolism. (1/98, 1/00, 2/02) pg 742
- Bacterial pneumonia. (1/99, 2/99, 2/00) pg 748-749
- Legionella pneumonia. (1/01, 2/02, 1/05) pg 749
- Atypical pneumonia (1/03) pg 751-752
- Influenza (1/05, 1/09, 1/10) pg 751-752
- Malignant mesothelioma (1/09) pg 768-769

Pathology Unit 22:

Viva Questions

- Peptic ulcer disease (1/08) pg 816-819
- Bacterial enteritis. (2/01, 2/02, 2/04) pg 833-834
- Salmonella dysentery (2/04, 1/06) pg 835
- Cholera (2/04, 1/06) pg 835-836
- Crohns disease (2/05, 1/09) pg 847-849
- Ulcerative colitis (2/05) pg 849-851
- Ischaemic bowel disease (2/05, 2/09) pg 851-853
Pathology Unit 23:

Viva questions:

- Cirrhosis:
  - Basic pathological principles (1/97, 1/05) pg 882-883
  - Pathophysiology of the consequences. (1/97) pg 883
  - Portal hypertension. (1/05, 1/10) pg 883-885
- Mechanisms involved in the formation of ascites. (1987, 2/95)
- Tell me about unconjugated jaundice. (2/97, 2/98, 2/99, 2/00) pg 887
- Hepatitis A (2/05, 1/08) pg 890-891
- Hepatitis B infection.
  - Describe the serological changes (1/92, 1/96, 1/97, 2/98, 1/04) pg 893
  - Pathogenesis (1/97, 2/98) pg 892
  - Clinical syndromes, pathological consequences. (1/97, 2/02, 2/05)
- Hepatitis C
  - Tell me about the pathogenesis. (1/00, 2/01, 2/02, 1/08) pg 894
  - Consequences. (2/02, 2/06, 1/09) pg 895
- Hepatitis D (2/06, 1/10) pg 895-896
- Pathogenesis of chronic viral hepatitis. (2/01) 898-899
- Pathogenesis of fulminant hepatitis. (2/01) pg 899-901
- Alcoholic hepatitis and consequences. (2/02, 1/07) pg 904-907
- Cholelithiasis – pathogenesis and consequences. (2/02, 1/07) pg 928-931

Pathology Unit 24:

Revision Week

Pathology Unit 25:

Viva Questions

- Leukopaenia:
  - Pathological causes (1/97)
  - Immunological consequences (1/97)
**Pathology Unit 26:**

**Viva Questions**
- Tell me about acute pancreatitis. Consequences. (2/96, 1/98, 2/02, 1/04, 1/05, 2/06, 2/09) pg 942-944
- What are the complications of chronic pancreatitis? (2/96) pg 945-946

**Pathology Unit 27:**

**Viva Questions**
- Tell me about the causes of anaemia. (2/95) pg 623
- Discuss the pathological basis of haemolytic anaemia. (1/97, 1/99, 1/10) pg 624-625
- Sickle cell anaemia (1/08) pg 628-632
- Pernicious anaemia (2/06) pg 639-642
- Tell me about microcytic anaemia. (2/97) pg 643-646
- Von Willebrands disease (2/07, 1/09) pg 655
- Haemophilia A (2/07) pg 655
- Tell me about DIC. (2/00) pg 656-657
- Pathogenesis of DIC. (2/03, 1/08, 2/09) pg 656-658

**Pathology Unit 28:**

**Viva Questions**
- Fracture healing:
  - Sequence of events. (1/96, 2/98, 2/00, 2/01, 1/03, 1/05, 2/07) pg 1288-1289
  - Pathological processes affecting ? (2/02) pg 1289
- Avascular necrosis. (2/01) pg 1289-1290
- Tell me about osteoarthritis. (1/98, 2/05) pg 1304-1305
- Rheumatoid arthritis (2/05) pg 1305-1308
- OA versus RA. (2/01) pg 1304-1308
- Tell me about gout. (2/05, 1/08) pg 1311-1314
Pathology Unit 29:

Viva Questions

- Pituitary adenoma (2/08)
- Hyperthyroidism (2/97, 2/08)
- Graves disease. (1/06)
- Thyroiditis. (2/98)
- Pathogenesis of Type 1 DM. (1/98, 1/06, 2/08, 2/09)
- Pathogenesis of Type 2 DM. (1/06)

Pathology Unit 30:

Revision Week

Pathology Unit 31:

Viva Questions

- Peripheral nerve transaction and repair. (2/98, 2/00, 1/03) pg 1330

Pathology Unit 32:

Viva Questions

- Non haemorrhagic CVA (2/07) pg 1363-1365
- Subarachnoid haemorrhage (1/07) pg 1366-1367
- Ruptured berry aneurysm (2/07) pg 1367
- Bacterial meningitis. (2/00, 1/07, 1/10) pg 1369-1370
- Non bacterial meningitis. (1/03) pg 1370
- Multiple sclerosis (1/07, 2/09) pg 1382-1384
- Alzheimers disease (2/07) pg 1386-1389

Pathology Unit 33:

Viva Questions

- Pre-eclampsia. (1/08)
