HUNTER NEW ENGLAND TRAINING IN Psychiatry

Registrar Training in Psychiatry

HNET Psychiatry
About HNET

**HNET refers to Hunter New England Training (in Psychiatry)**

We are recognised as a national leader in psychiatry training.

An integrated unit within Hunter New England Mental Health (HNEMH) catering for all the training and administrative needs of medical staff in our service.

**The HNET Philosophy**

We believe the HNET philosophy is a unique one in Australian psychiatry training. Our belief is that health service needs should support training and vice versa.

We also believe in recognising psychiatry trainees at an early stage and supporting them in their career choice.

We have implemented an Accelerated Psychiatry Program and JMO Teaching Program for Interns in our service to support our most junior medical staff.

We place great emphasis on those trainees who join our service, offering a contract to cover the period of basic training, flexibility in work hours, and a tailored training program, all of which have led to very high written and clinical examination success rates since 2004.

We offer high quality Advanced Training placements in a range of subspecialty areas in our service and the majority of such Fellows join our service as Staff Specialists upon graduation.

**Hunter New England Health - a great place to work, a great place to live**

HNEMH is part of the HNE Local Health District, a recognised leader in health innovation in Australia. The Hunter New England lifestyle is one of the best on offer in Australia, whether you are seeking comfortable cosmopolitan beach-side living or a semi-rural relaxed lifestyle.

**Construct your Career with**

HNET is proud of its premier Psychiatry Training Program

Each year we select 8-10 First Year Trainees to join our Registrar cohort. Psychiatry Trainees who are successful in being appointed to the HNET Network are provided with a tenured training experience, which allows them to fulfill all of their Basic Training requirements with the Royal Australian and New Zealand College of Psychiatrists (RANZCP).

Registrars typically undertake the first 12-months of their training as full time. You will commence your training in Acute Adult Psychiatry, which is available at the Mater Hospital in Newcastle (Waratah), The Maitland Hospital, Morisset Hospital, Manning Base Hospital, or Tamworth Rural Referral Hospital.

A 6-month rural rotation is required for psychiatry trainees in NSW and our current sites for this are Tamworth, Armidale and Taree. On secondment, you will receive travel support, accommodation at our expense, a grade higher in pay, and access to the training program via videoconference.

Other mandatory basic training experiences are Child and Adolescent, available at the Nexus Inpatient Unit or the Newcastle, Lake Macquarie, Hunter Valley, Taree or Tamworth community CAMHS Services; and Consultation-Liaison Psychiatry, available at either the Mater, John Hunter, Maitland, or Tamworth Hospitals.

The remainder of training consists of electives and various assessments, including a scholarly project, a long psychotherapy case, workplace based assessments (WBAs) that lead to entrustable professional activities (EPAs), and examinations (both written and clinical).

The type of elective rotations we have available include:

- Various community mental health service rotations
- Older persons psychiatry
- Forensic psychiatry
- Neuropsychiatry
- Rehabilitation psychiatry
- Addiction psychiatry
- Drug & Alcohol community secondment
- Education and training rotation
- Psychotherapy training

HNET is an award-winning training program.

In 2008, HNET was a recipient of the HNE Health Quality Award and a finalist in the NSW Health Quality Awards for its training programs. More recently in 2021, HNET was a finalist in the HNE Health Excellence Awards, High Value Health Care Award (People & Culture) with a submission titled “Training and sustaining a psychiatry medical workforce”.

Training is tailored to the developmental level of the trainee with specific lectures provided to First Year trainees, trainees midway through their training, and trainees approaching examinations. Teachers include local experts as well as binational and international experts.

Trainees are paid to attend lectures during work time and lectures are not interrupted by pagers or mobile phones. HNET has an excellent reputation for training that is exemplified by the success of our trainees – HNET registrars are highly successful in their RANZCP examinations, evidenced by a high pass percentage comparative to the rest of Australia and New Zealand.

Since 2007, the local Formal Education Course has been provided free of any cost to HNE network trainees!

We honestly believe that HNET is not only the best psychiatry training program in NSW but one of the best in Australia and New Zealand. But don’t ask us - speak to our trainees and Consultants.

Dr Harsimrat Sandhu, Director of Training, HNET
Advanced Training

What happens after Basic Training?

Following successful completion of Basic Training requirements, registrars are invited to apply for Advanced Training positions in the generalist stream or in the subspecialty streams. Advanced Trainees are supported to attend an appropriate educational program, as part of their work time. Ultimately, we hope that our trainees will take up a senior position in our organisation as a Staff Specialist.

HNET encompasses the full spectrum of Advanced Training opportunities available under the RANZCP

Recent HNET Advanced Trainees have achieved subspecialty Advanced Training Certificates in the following subspecialties:

- Adult
- Child and Adolescent
- Consultation-Liaison
- Forensic
- Older Persons
- Psychotherapy
- Addiction

Formal training for Advanced Trainees is generally organised on a Statewide or even binational level

HNET supports its ATs in attending formal training programs with paid study leave. We also recognise that Advanced Training is a particularly important phase in your development as a Consultant Psychiatrist and therefore provide a local training and mentoring program to assist you in the development of professional and consultant level skills in order to prepare you for the next step in your career.

Our advanced trainees form peer review groups in preparation for formal CPD requirement and play key leadership roles in the service, often taking on senior tasks such as developing policies and guidelines, committee participation, organisation of training programs and administration for other medical staff.

HNET also welcomes applications for Advanced Training from suitable Registrars not currently working for HNE Local Health District.

Support for your Medical Education

The Medical Education Support Officer is a full-time role dedicated to training and is the main point of contact for College Trainees. Philippa Ditton-Phare organises regular training sessions for Stage One and Stage Two registrars, as well as exam preparation sessions for College written examinations.

The training scheme keeps a record of all training activities and can advise on trainees’ College trajectory. It is important to note that training for College trainees in our region is free!

One of the impressive achievements of HNET is that all of its formal training programs are delivered in live sessions with face-to-face delivery, as well as being videoconferenced to enable trainees to participate in education from distant sites. It also means that we are in high demand from trainees in other parts of rural Australia to provide formal training.

Dr Philippa Ditton-Phare, Medical Education Support Officer, HNET
Medical Administration is part of the overall HNET Unit

Medical Administration is likely to be your first point of contact on commencing with the service and will assist you in organising registrations, visas (where required), pay documentation and orientation requirements, as well as being responsible for organising the after hours roster for the junior and senior medical staff.

Contact Medical Admin on (02) 4033-5156 or email at HNELHD-HNET@hnehealth.nsw.gov.au

HNET MISSION

A commitment to a high quality training program, early identification of potential trainees, retaining high quality medical staff and matching training needs to service needs and vice versa.

For more information about medical jobs and training at HNET, please contact us at

facebook.com/HNETPsychiatry

HNELHD-HNET@hnehealth.nsw.gov.au

The Hunter New England Mental Health Psychiatry Training Program (HNET Psychiatry) is the only regional based psychiatry training program in Australia. Our mid-sized program ensures sufficient numbers of trainees at each level to make progressing through training requirements sustainable, with a collegiate and “personal-touch” focus.

Exam and hurdle task pass rates are higher than state and binational averages. HNET Psychiatry offers fantastic examination preparation programs.

Psychiatry Training

Good Work

- **Patient engagement** – time to understand
- **Variety** – each person differs, but the work differs in inpatients, community, addiction, C/L, C&A etc etc
- **Complexity** – managing people’s problems from a biopsychosocial perspective
- **Effective treatment** - strong and growing evidence
- **New frontiers** to be researched
- **New technologies** to explore brain/mind interaction
- **Teamwork**

Good Life

- **Training flexibility** – The College supports part time and breaks in training
- **Less frequent overtime** – rosters are 1 in 10 to 1 in 20
- **Overtime can be flexible** – Monday nights example
- **Private practice, part time etc etc** options later
- **Job satisfaction** – we can make a real difference
- **Personal growth** – Better people are better psychiatrists

**Strong Team**

Includes:

- The current and 2 former chairs of BTC
- The two immediate past chairs of the binational CFT
- One DoAT
- One Maddison Medallion winner
Covering Northern Sydney, Central Coast, Western New South Wales and Far West Local Health Districts

Our Network covers a large suburban and coastal area north of the Harbour Bridge through to the Central Coast. The population is mixed culturally with a significant percentage of residents from non-English speaking backgrounds.

There is an excellent network of hospitals and community services with units of world repute. The following rural sites are included: Bloomfield Hospital (Orange), Dubbo Base and Broken Hill Base Hospitals.

Our Network offers a diversity of training experiences:

- Addictions (8 posts)
- Psychiatry of Old Age (12.5 posts)
- Child and Adolescent (12 posts)
- Consultation-Liaison (10 posts)
- Rehabilitation,
- Mood Disorders (3) and Eating Disorders (2)
- There are 23 FTE accredited training positions in community health
- 7 FTE in private settings, plus 9 at new PPP
- A full time psychotherapy post
- Tresillian Family Care Centres
- Specialist Addiction Service for Adolescents (SASA)
- A position in Indigenous Mental Health and forensic

Royal North Shore Hospital (RNSH) and Community Health Service

- Is a 634 bed tertiary referral centre.
- NSRHS serves a population of over 300,000 people
- 22 accredited posts

Macquarie Hospital

- Macquarie Hospital is a 195 bed specialized mental health residential facility. It is situated on a 135-acre of parklands.
- 7 training posts
Hornsby Ku-ring-gai Hospital

- Hornsby Ku-ring-gai Health Service (HKHS), Serving Hornsby and Ku-ring-gai LGAs
- The hospital is a teaching hospital of the University of Sydney.
- There is a $321 million redevelopment due for completion in 2021.
- 14.5 accredited positions

Northern Beaches Hospital

- Serves the people of Manly-Warringah and Pittwater Councils
- New private-public partnership, opened October 2018
- 9 training posts

Gosford and Wyong District Hospitals

- MHIPUs at both Gosford and Wyong
- PECC at Wyong and soon Gosford
- Old age psychiatry ward at Wyong
- Numerous CHCs
- Associated with Newcastle medical school
- 23 training posts

Rural + Forensic

- 12 posts at Orange
- 2 at Dubbo
- 1 at Broken Hill
- 1 at Justice Health

Formal Educational Course

- All College trainees are supported to attend the FEC
- 4 hours a week, 40 weeks per year
- FEC is run by HETI or USyd or HNE
Psychotherapy training

Dr Sandy Kuiper does psychotherapy group training sessions at each site.

He and others provide group or individual psychotherapy supervision per College guidelines.

Other education

- Each site has journal clubs and case presentations – due to COVID-19 and social distancing requirements, the educational sessions are presented via Skype.

- CBT training at RNSH and Hornsby.
SYDNEY WEST AND GREATER SOUTHERN (SWaGS) NETWORK

The SWaGS Network covers a population of approximately 1.5 million people with a rich multicultural background.

This network extends from Westmead and Parramatta (the demographic heart of Sydney) to the Blue Mountains, and across to our rural sites in Southern NSW. Our rural sites include Goulburn, Wagga and Albury.

Some facts about SWaGS:

- 89 training positions
- Complete range of general and specialist training experiences
- Great opportunities for Stage 1, 2 and 3 training
- This training zone has spectacular opportunities
  - The most extensive psychotherapy training program in NSW offering free psychotherapy supervision for all trainees and a specific psychotherapy registrar position
  - Long term complex rehabilitation programs
  - The inpatient care of the medically ill psychiatric patient
  - Anxiety disorders and Obsessive Compulsive Disorder
  - Mood Disorders
  - Inpatient and community based early intervention programs
  - A large number of stage 2 and advanced training CL and Child & Adolescent Psychiatry training positions
  - Perinatal Psychiatry

Our training sites include:

Westmead Hospital, a major University of Sydney teaching hospital, specialising in Child & Adolescent Psychiatry, CL Psychiatry, Old Age Psychiatry, Perinatal Psychiatry and Eating Disorders. The CL Psychiatry department in Westmead hospital is one of the foremost in the state
**Cumberland Hospital**, a major University of Sydney teaching hospital, specialising in Mood Disorders, Rehabilitation Psychiatry, Early Intervention, Addiction Psychiatry, Care of Homeless Mentally Ill Persons, Forensic Psychiatry, High Dependency Inpatient Psychiatric Care, Dynamic Psychotherapy program and extensive community services.

**Nepean Hospital**, a major University of Sydney teaching hospital, specialising in Child & Adolescent Psychiatry, CL Psychiatry, Old Age Psychiatry and extensive community services.
Blacktown Hospital, a major University of Sydney teaching hospital, specialising in Child & Adolescent Psychiatry, CL Psychiatry, Old Age Psychiatry, Rehabilitation Psychiatry and Assertive community care.

Other training experiences include:

- **The Children's Hospital Westmead**: the option of one of 5 different Child Psychiatry terms
- **St Joseph's Hospital**: Psychiatry of Old Age
- **Northside West Private Hospital**: Mood Disorders and Addiction Psychiatry
- **St John of God Richmond**: specialising in military psychiatry, substance abuse, PTSD
- **Uniting Care Headspace**: Early Psychosis Program
- **Perinatal Psychiatry**: St John of God, Raphael Services
- **Justice Health**: Forensic training at either Silverwater or Long Bay
- **Rural Program**, Goulburn Hospital, Albury Hospital and Wagga Wagga Hospital

Particular attention is given to preparing trainees for RANZCP examinations

- Weekly OSCE preparation and mock exams
- Weekly essay writing preparation
- Free individual psychotherapy supervision
- A Scholarly Projects Committee to assist trainees
- The Training Zone has many experienced RANZCP examiners to provide expert tuition and guidance.

Trainee Welfare

SWaGS is a friendly, supportive training environment. Trainees support one another and receive close supervision and mentorship from our consultant group. Trainee welfare is at the heart of the training program in SWaGS.

Your Psychiatry Training Opportunity of a Lifetime

The SES Psychiatry Training Network boasts a range of career, lifestyle and training opportunities that are unsurpassed.

We are a large Psychiatry Training Network in New South Wales providing a complete Royal Australian and New Zealand College of Psychiatrists (RANZCP) accredited program from Basic through to Proficient and completion of Advanced Training.

Trainees rotate through all the mandatory terms and have a choice of a broad range of additional placements including subspecialties as diverse as Old Age Psychiatry, Child Psychiatry, Early Intervention, Emergency Psychiatry, private hospitals, Peri-Natal Psychiatry, Justice Health, Psychotherapy and Intellectual Disability Psychiatry. There are many professorial units to which registrars can be allocated, including the Black Dog Institute, CRUfAD and Neuropsychiatry.

Our hospitals and community clinics hug the coast from iconic Byron Bay through Bondi to Jervis Bay and in between.

We include three universities, multiple teaching hospitals and over one hundred and thirty RANZCP positions. Many services have supportive RMO rotations.

Each site has a local psychiatrist who coordinates training. The trainees have a strong voice in plans for training, from the multiple trainee representatives on the Network Training Committee to Trainee Representatives allocated at each hospital.

We have an enviable pass rate in the RANZCP exams, supported by specific teaching in examination technique.

Although we span a large service, each six month rotation sees you as part of a small functioning unit with its own culture and cohesion. You will have variety, from rural to inner city, the richest and the poorest areas of NSW, from pre-natal mental health to old age. Registrars are a welcome part of the team, working alongside psychiatrists.
At the end of each allocation you will meet with the Director of Psychiatry Training and the Psychiatry Education Support Officer to review your training term and your progress through the RANZCP training program. We try to be as flexible as possible in supporting your training experience including supporting short term secondments to other Psychiatry Training Networks in NSW and interstate and accrediting short term training experiences overseas.

The NSW State Government has budgeted over $1.5 billion over recent years for the rebuild of many of the Network’s Hospitals; Tweed Base is to be relocated and rebuilt, Byron Central Hospital was recently relocated and an entirely new hospital built, Lismore Base Hospital has recently been renovated, St Vincent’s Hospital recently relocated and services moved to a purpose built building, a $700 million redevelopment is currently underway at the Prince of Wales Campus, St George Hospital has had a recent rebuild with increased bed numbers, The Sutherland Hospital has been renovated and the Shellharbour Hospital is currently been extended.

You will have the opportunity to join a strong workforce serving a population of more than 2 million residents and travellers along the breathtaking NSW coast. Employees enjoy a range of benefits including; salary packaging, flexible work practices in some terms, and continuing education opportunities.

Network E: Sydney South West North Coast (SSWNC) Network

Covering South Western Sydney, Sydney and Mid North Coast Local Health Districts

The Sydney South West Area covers the inner western suburbs of Sydney, and the south western suburbs which are the fastest growing parts of Sydney. The network comprises both rural and urban areas, and a culturally diverse catchment population. The area includes Sydney’s largest Koori population as well as sizeable Vietnamese, Italian, Greek, Lebanese, South American and African communities.

We offer excellent training in Psychiatry and provide training in all the accredited terms as required by the Royal Australian and New Zealand College of Psychiatrists. They are Adult General (inpatient and integrated hospital and community), Child and Adolescent, Forensic (Long Bay Prison Hospital), Psychiatry of Old Age (both inpatient and community), Consultation Liaison, Drug and Alcohol, Rehabilitation Psychiatry, Aboriginal Mental Health, Eating Disorders, Early Psychosis Intervention (EPIP), Intellectual Disability, and Trans-cultural Psychiatry.

There is a strong academic input with opportunities to do research at our Collaborative Centre for Cardio-metabolic Health in Psychosis (ccCHIP), the Centre for Excellence in Relapse Prevention and Neurosleep study and treatment resistance depression clinic, a partnership with the Brain & Mind Centre and Sydney University.

Additionally, our network offer two unique terms to eligible trainees: STARTTS (Service for the Treatment and Rehabilitation of Torture and Trauma Survivors), Out of Home Care and Whole Family Team (for Advanced Trainees in Child & Adolescent Psychiatry and Generalist Psychiatry) and Veteran Health Centre (the only Centre in NSW based at Concord Centre for Mental Health).

The network also offers a number of Specialist Training positions at St John of God Hospital (Burwood), Brain & Mind Centre, the Chris O’Brien Life House (RPA), and the Aboriginal Mental Health Service at the Royal Prince Alfred Hospital.

The aim of the network training program is to provide a breadth and depth of psychiatry training that supports trainees in achieving both the highest possible pass rate in the RANZCP examinations, as well as great flexibility in long-term vocational preparation. We pride ourselves in a program which provides a range of options for supervision regarding the Psychotherapy Long Case, offered in a number of locations across the network. Additionally, we provide a comprehensive training and supervision program regarding other psychotherapy modalities, in particular Supportive Psychotherapy and Cognitive Behaviour Therapy. We have a strong focus on preparing trainees for their RANZCP examinations and provide a broad teaching program which includes teaching sessions and mock exams for both the Written and OSCE exams.
