

Extend your understanding of end of life care

Persons approaching and reaching the end of their lives commonly connect with health care professionals across a range of care settings. This learning pathway enables the clinicians to gain additional awareness and knowledge that supports the provision of optimal care.

This learning pathway consists of five modules and represents three hours of learning engagement.

- Enabling person centred end of life care for people living with dementia, mental illness, or intellectual disability

Course Code: 361669192

- Enabling culturally sensitive end of life care for Aboriginal people

Course Code: 367679883

- Culturally responsive end of life care for people from culturally and linguistically diverse (CALD) communities

Course Code: 371772300

- End of Life Screening and Planning

Course Code: 399106725

- End of Life symptom assessment and management

Course Code: 399107031
