MY HEALTH LEARNING

Do you know the minimum standards for monitoring a patient receiving procedural conscious sedation?

This module is targeted at nurses working with patients who receive procedural conscious sedation. As a member of a team, you will learn how to identify, respond and react in the pre, intra and post procedure periods.

Online training is now available to support you to:

- Identify what location, equipment, and staffing are required before starting a procedure
- Recognise and respond to common complications encountered during procedural conscious sedation
- Explain sedation periods and the criteria to discharge a patient home or handover the care to an alternate staff member
- Identify the resources and documentation required for procedural conscious sedation.

Know your role and responsibilities.
