

How would you respond to a breech presentation, shoulder dystocia or cord prolapse?

Time is critical when you need to identify and manage breech presentation, shoulder dystocia or cord prolapse. In this module, video simulations take you through techniques you can use in these emergencies. You will also learn strategies to address human factors.

Through the use of video simulations, medical illustrations, job aids and practice activities, you will:

- identify risk factors, recognise, respond and escalate appropriately for these maternal emergencies
- apply your knowledge of physiology and potential impact on maternal and/or fetal wellbeings
- recognise the impact of human factors and identify strategies to improve care and reduce adverse outcomes.

Recognise. Identify. Apply.
Complete your training now.
