

Caring for People Living with Dementia

This learning pathway - Caring for People Living with Dementia, will help you to develop an understanding about the different causes of dementia including diagnosis, and the different needs, and changed behaviours of the person living with dementia. Interactive content and real-life videos provides engaging content which focuses on how to respond effectively to care needs.

The content provides a consistent application of person-centred approaches when providing care for the person living with dementia.

Interactive content and real-life videos outlines how you can:

- develop an understanding about the causes of dementia and the impact on the individual
- recognise the different presentations of dementia and the importance of an early diagnosis
- identify and investigate care needs which may cause changed behaviour.

Improve care. Enhance quality of life.
