

Learn how to have positive conversations with consumers about virtual care

This module can support you to have positive conversations with consumers and their carers about virtual care – including how it is used and consumer choices and options.

Watch two short videos in this 10-minute module to learn ways to discuss the benefits, uses and effectiveness of virtual care:

Learn how to:

- support consumers and carers to recognise advantages of including virtual care approaches where appropriate
- answer consumer and carer questions and discuss concerns they may have
- ensure their decision to include virtual care is well-informed.

Empower informed decisions about virtual care.
