

How do you approach important conversations with families about child health and development?

Health and development checks can raise sensitive issues. This module supports Child and Family Health professionals to have confident, empathetic conversations with parents and carers about their child's health and development.

In this module, explore communication strategies and follow real-life scenarios to:

- build confidence in supportive conversations with parents and carers
- guide families to early intervention and health care options
- use these skills across diverse child and family health contexts.

Support families with care and confidence.
