MY HEALTH LEARNING

Confused about how the Aged Care Quality Standards work in your Health Service?

Aged Care services in NSW Health must now work in line with the Australian Government Aged Care Quality Standards. This module supports staff working in Aged Care services to consider how their daily practice supports the intent of these Standards, and how this can be captured for accreditation purposes.

Through a short video scenario, this module outlines:

- the role of the Aged Care Quality Standards in NSW Health
- the relationship between the Standards and your everyday clinical practice
- how there are opportunities to share supporting evidence across the Aged Care Quality Standards and the National Safety and Quality Health Service (NSQHS) Standards.

If the Standards reflect our care, the evidence must be there. Complete your training now.
