# Basic Sciences of Oncology Course (BSOC)

A multidisciplinary program for health professionals working in cancer care.

## About the program

The Health Education and Training Institute in partnership with the Cancer Institute NSW present the Basic Sciences of Oncology Course 2026.

Applications are now open for this NSW-based, multidisciplinary training program that supports lifelong learning in cancer medicine.

2026 will include 9 virtual sessions and 1 in-person session at 1 Reserve Road, St Leonards on 16 October 2026. The course is designed to provide core skills in the areas of:

- Clinical Pharmacology
- Anatomy
- Physics
- Communication
- Tumour Biology
- Research & Evidence Based Oncology
- Radiobiology
- Palliative Care and Survivorship
