

How to approach substance use assessment and collaborate with clients to formulate their care plan

This is an introductory module about comprehensive assessment and care planning - part of the Clinical Care Standards for Alcohol and Other Drugs (AOD).

You will learn how to explore a client's substance use history, develop a clinical formulation and collaborate on their care plan.

Online training is now available to support you to:

- Understand comprehensive AOD assessment
- Identify risks, psychosocial and cultural needs
- Develop a formulation to inform treatment and management options
- Develop a care plan in collaboration with the client, significant others and service providers.

Engage and collaborate. Complete your training now.
