Learn how to use ECAT Protocols to initiate patient care

The Emergency Care Assessment and Treatment (ECAT) Protocols facilitate registered and enrolled nurses to initiate emergency care within their scope of practice. The Protocols support consistent and timely clinical care for adult and paediatric patients across rural, regional and metropolitan settings.

This module explains how you can:

- Use the ECAT Protocols within your nursing scope of practice
- Apply clinical reasoning in assessment and decision making when initiating care
- Be aware of risks associated with cognitive bias when using ECAT Protocols.

Initiate safe and timely clinical care. Complete your training now.
